1200MAH BATTERY CAPACITY

Priv N19 has built-in 1200mAh battery, which can provide you with long time vaping.

01

Hold the tank with one hand, and use another one to press button and then move it counterclockwise.

02

Add e-liquid through the slot, and pay attention not to drip it into the central airflow tube.

03

Close the cap carefully and firmly, then let it stand for several minutes to get the cotton completely saturated.

It might roll slightly but will come to a complete stop before it plummets to the concrete below. There are buttons under the display for adjusting the wattage. The device has a LED clear and bright screen which makes it easy for the user to read the displayed information. Out of the box this device feels good in the hand. The outer shell is made with durable and top-quality plastic. It has a decent flavor thanks to the coils. It comes in two editions with the following difference: The NORD AIO 19 Kit implements a direct output voltage system in which power levels depends on the state of the battery capacity. It shares a few similarities with the Novo, although it has a few of its own unique features. Let's get to the particulars. How to Re-fill the Nord AIO 22 Filling the tank of this device is pretty simple. This is because, you will not have to refill the device, change the coils, or other maintenance needs of the device. It's designed to offer pre-set airflow levels, depending on which NORD coil is installed. Upon comes in six different flavors to take care of all your taste buds. The charging port-USB-Type-C is hidden under the rubber plug. With its compact and lightweight design, this is a good entry-level mod, or a great on-the-go backup. The pros of disposable vapes is that they are affordable and easy to use. Smok is one of the most sought vape brand. There are shared similarities with the devices as well as differences. The most important aspect to consider when buying a vape device is the portability, charging system, the wattage output, the coils, and the type of vaper you are, i.e. MTL or DL. It might also be the diamond-shaped fire button, which is firm and clicky, but with just enough LED light to be noticeable, even outdoors. When laid flat on a table. Performance of Smok Nord AIO 22 Vape Device The Nord AIO 22 is a high-performance device with a capacity of 3.5 ml and a maximum wattage of 60W. The 1.4 Mesh coil is designed for MTL vaping, specifically throat hit. The Smok Nord X Pods The Smok Nord X kit comes with a pair of pods for the RPM coils and new RPM2. I didn't like the integrated airflow design at first but it kind of grew on me. This could be a con for some people (ED: Like most of us in the office)but the unintended function actually made the experience unique for me. It gives out great wattage, and in return you get an excellent flavor. Smok Nord is powered by a 1100mAh battery. Let's get to know the Nord Smok a little more; The Smok Nord Kit comes with: Nord pod system 6-ohm mesh coil 4-ohm regular coil USB charging cable User manual The Design The Smok Nord has similar external features with the Smok Novo. The 0.4ohm RPM isn't bad either. However, if you have a busy lifestyle and you cannot keep up with maintenance of a regular vape system, get yourself a Upone disposable vape. The internal tank features the same coil system introduced with the SMOK NORD Pod System, implementing a pair of 0.6ohm NORD Mesh Coil catering to the sub-ohm, cloud-focused segment while the 1.4ohm NORD Traditional Coil is suited for MTL-draw users. The Smok Nord Coils and Performance The Smok Nord Kit comes with two coils, the MTL and the Sub Ohm Mesh Coils. Which also double as some smart functional design components, Nord AIO 22 Kit Contains: Nord AIO 22 Device Nord 0.6ohm mesh coil (max 25w) Nord 1.4ohm regular mesh coil (max12w) USB Cable User Manual Features and Design of Smok Nord AIO 22 The Nord AIO 22 is a simple and small vape device from SMOKTECH. The Battery Life The Smok Nord comes with a 1100mAh capacity internal battery which lasts long. The body of this device is made from Zinc alloy which enables it withstand all the pressure. However, I found that for a more restricted airflow, I could simply cover one of the holes with my fingertip. If you want to save on your battery and eliquid, this is the best coil to use. The 0.6ohm mesh coil head produced a satisfying vape after a minimal break in period. The 4.5ml tank capacity is three times bigger, compared to the size of most regular disposable vapes which usually have a capacity of 1.5ml. Features of Smok Nord AIO 22 Dimensions: 125.5 x 22mm Construction: Stainless Steel Battery Capacity: 2000 mAh E-liquid: 3.5ml capacity Resistance range: 0.5ohm-1.4ohm Standby Current:
